Id for instructions and subsequent approval we have disposed "Not working & not repairable computers and other devices.

Subsequently, we have put up "outdated not used" computers and other devices for disposal consideration.

Reasons:-

a. These devices are 14 to 20 years old and have been extensively used.

In computers - SMPS, RAM and HDD have been repaired/replaced many time.

RAM had been upgraded to maximum extent. Further upgradation is not possible.

These systems are running on WINXP/WIN7 for which support had ceased from Microsoft. They cannot be upgraded to WIN10.

monitors, projectors have been serviced many times.

SUBJECT: SCRAPPING OF obsolete computer systems which are not palatable with the current syllabus.

Details: We are submitting the list of old systems which cannot be made use of in the Laboratory due to its old configuration and deficiency in its adaptability to the software presently prescribed by VTU. Upgrading these computers is also not going to solve the problem. Hence, we recommend to scrap these systems.

SUBJECT: SCRAPPING OF obsolete computer systems which are not palatable with the current syllabus.

Details: We are submitting the updated list of old systems which cannot be made use of in the Laboratory due to its old configuration and deficiency in its adaptability to the software presently prescribed by VTU. Upgrading these computers is also not going to solve the problem. Hence, we recommend to scrap these systems.

SUBJECT: SCRAPPING OF obsolete computer systems which are not palatable with the current syllabus.

Details: We are submitting the list of old systems which cannot be made use of in the Laboratory due to its old configuration and deficiency in its adaptability to the software presently prescribed by VTU. Upgrading these computers is also not going to solve the problem. Hence, we recommend to scrap these systems.

NOTE

SUBJECT: SCRAPPING OF obsolete computer systems which are not palatable with the current syllabus.

Details: We are submitting the list of old systems which cannot be made use of in the Laboratory due to its old configuration and deficiency in its adaptability to the software presently prescribed by VTU. Upgrading these computers is also not going to solve the problem. Hence, we recommend to scrap these systems and arrange for procurement of new systems. We are of the opinion that the process of replacement of these obsolete system should be done before the commencement of New semester form August 2018
